

## **Science Assessment**

The assessment of Science is linked to the school's assessment policy and all work will be marked in accordance to this policy and the marking code. The children will be given the opportunity to respond to marking and answer any questions asked by the teacher.

Each area will be assessed in line with the National Curriculum using an internal assessment grid that is used consistently throughout the school. This shows whether a pupil is on track, above or below age expected understanding.

These assessments will be used to help inform future planning and the support that is required for individuals to ensure that they can all access the curriculum and achieve an age appropriate standard or above.
