

Design an Electrical Invention

Electricity is charged particles that pass through a wire. Many things in our homes are powered by electricity, such as toasters, hairdryers, lights and radios. Using the box below, design and label your own electrical invention.

About my design: _____

Did You Know...?
In 1821, the first electric motor was invented by Michael Faraday.

Send in some pictures if you have a go to: aen@birchington.kent.sch.uk and with your permission we will put them on the next newsletter.
