

Protective Headgear

Your task is to design a type of protective headgear. You need to think about who will be wearing your protective headgear and when it will need to be worn. This will determine what materials you will use and what features the protective headgear will have. Think about professions and activities that may require the participants to wear protective headgear.

Complete the table below.

What is the purpose of the protective headgear?	
Who will be wearing the protective headgear?	
What materials is it made from?	
Can it be worn in all types of weather?	
Any special features?	

Draw and label your protective headgear design.

Send in some pictures if you have a go to: aen@birchington.kent.sch.uk and with your permission we will put them on the next newsletter.
