Computing

Making It Real

Lessons

Computing lessons are always fun and engaging for the children as they are able to physically control digital systems such as a computer, tablet or laptop.

Other subjects may use the Computer Suite for their lessons as well, allowing technology to help to bring their learning to life!

Displays

Our fully equipped Computer Suite is full of wonderful displays that showcase children's learning, provide helpful vocabulary and support and show Online Safety reminders.

Theme Days

Safer Internet Day is a yearly themed event. At Birchington, we take part in different ways across the school and enjoy learning about Online Safety! Safer Internet Day 2024 had the theme *Inspiring change? Making a difference, managing influence and navigating change online*
